***If you're reading this brochure, then you're considering doing a course through Hudson. So what can you expect from us?***

Hudson provide training to learners all around the world. The majority of our online courses are accessible across most devices including desktop, tablet, and smart phones. Courses are designed to fit around the schedules of our learners. Our training is simple to use and highly effective. We offer a range of features designed to get you certified faster. Some of these incredible features include video and audio based training so you can see and hear your tutor 24/7, as well as online tutor support, and online labs to practice your skills in a simulated environment.

Customer service is the focus of our company ethos. By ensuring all support matters are dealt with quickly and effectively, we maintain high levels of customer satisfaction.

Companies that put their trust in our brand include Michelin, Pfizer, BT, NHS, Jaguar Land Rover, and Network Rail... just to name a few. We aspire to deliver the highest standards with the ultimate aim of helping our learners fulfil their learning objectives. In addition to offering self-paced online training courses, Hudson also offer traditional classroom based learning, live online classes, and distance learning Diploma courses.

Read on to learn about the features and benefits of training with Hudson.

#### Highly Recommended!! Microsoft 2013 Bundle

Highly recommended!! Hudson courses are user friendly and easy to access. Course material/videos are laid out in easy accessible format. The Hudson team deliver great service to the consumer and the team are a phone call/email away and respond promptly and effectively to any questions you may have.

Hudson service is exemplary and I will definitely be looking to undertake another course once I have finished this one.

Thank you

#### Excellent Service!

Excellent service, always willing to go above and beyond! They answer any questions and concerns promptly and effectively. When signing up to my course they made the process extremely simple for my team and have maintained brilliant communication throughout my course when needed. The course is very good quality. I 100% recommend Hudson.

## **Learn at your own pace in your own time**

Prefer to learn at your own pace? Our self-paced courses allow you to start and stop whenever you like. Enjoy 12 months access on most of our self-paced courses.

## **Get 12 months access on most courses**

Enjoy 12 months unrestricted access on most of our courses, including self-paced and live online classes. Let our learning revolve around your schedule.

# KEY FEATURES OF COURSES

## Expert Instructor-Led Training

We only use the finest instructors in the IT industry. They have a minimum of 15 years real-world experience and are subject matter experts in their fields. Learners can fast-forward, repeat or rewind all of their lectures. This creates a personal learning experience and gives them the benefit of hands-on training with the flexibility of doing it around their schedule 24/7.

## Visual Demonstrations & Multimedia Presentations

Our courseware includes instructor-led demonstrations and visual presentations that allow students to develop their skills based on real world scenarios explained by the instructor. We always focus on real world scenarios and skill-set development.

## Quizzes & Exam Simulators

Our custom practice exams prepare the learner for their final assessment differently and more effectively than the traditional exam preps on the market. Each learner has access to practice quizzes after each module to ensure they are confident on the topic they have completed before proceeding. This will allow them to gauge their effectiveness before moving to the next module of their course. Hudson courses also include practice exams designed to replicate the environment in the testing center as closely as possible. These exams comprise of 100 questions on average.

## Social Learning & Networking

The intuitive course platform allows a learner to interact and collaborate with other students and staff, form study groups, engage in discussions, rate and 'like' different courses and stay up to date with all the latest industry knowledge. This course platform is unmatched in the industry and makes learning fun and enjoyable.

## Flash Cards & Educational Games

Hudson knows that education is not a one size fits all approach. Individuals learn in different ways using different tools. That's why Flash Cards and Educational Games are provided throughout our courses. This allows the learner to train in ways that keep them engaged and focused, as well as retain their knowledge in a more effective way.

## Navigation & Controls

Hudson's self-paced training programs are designed in a modular fashion to allow a learner the flexibility to work with expert level instruction anytime 24/7. All courses are arranged in defined sections with navigation controls allowing them to control the pace of their training. This allows them to learn at their own pace around their schedule.

# LIVE LABS

## What are Live Labs?

Live Labs are in essence simulators for IT learners. They allow an individual to apply their course skills in a software environment that is not harmful to others or equipment. As an example, a learner can configure a network and setup a firewall within such an environment. Live Labs not only provide learners with valued experience, but help to better prepare them for their final exams. All Live Labs come with instructions and tasks. These tasks are related to the material covered in a course. For instance, if a learner undertakes a networking course, s/he will be required to undertake networking related tasks in his or her Live Lab.

## Why use a Live Lab?

In today's world of complex IT systems and technologies, it is essential that IT professionals and those new to IT are able to demonstrate how to use and understand various systems and software. Using Live Labs can help develop a learner's practical IT skills in a safe working environment without the need to invest in hardware and software. With the ease and convenience of the Internet, we provide the learner with access to real equipment that brings theory to life and gives them a greater depth of technology understanding. Having Live Lab experience can also give a learner an edge on their CV.
