ADVANCED DIPLOMA IN FINANCIAL TRADING

WHO WE ARE

Financial Markets Online's courses are taught by globally recognised FX traders and educators. With years of experience working for tier 1 financial institutions and banks, trading alongside some of the industries greatest traders. We have condensed our knowledge and experience into easy to digest trading courses suitable for all levels. We have taught over 15,000 new traders how to create an additional income stream from the financial markets.

Being part of Financial Markets Online gives you the opportunity to cover a wide spectrum of trading styles and asset classes, from short term trading, swing trading, position trading and investment theory of stocks, Exchange traded funds, options, futures (Eminis & Commodities) and currencies.

As a Financial Markets Online member, you will become part of a community of active traders committed to success through continuously improving their professional skills.

Our higher level, credit bearing programmes are externally recognised at 'Associate Membership' level by the Chartered Institute for Securities & Investment (CISI), one of the world's leading professional bodies for finance and investment.

PUBLICATIONS & REVIEWS

Leading global financial news publications like Forbes, Financial Times, Investing.com and many more regularly ask our head traders for their insights and expectations on the financial markets and major news events. Our experience and knowledge is shared amongst millions of readers who look to understand the world of trading in more depth.

Reviews:

★ Trustpilot  4.9

Google  4.8

"The best education platform, has amazing coaches, you have access to traders who trade for a living and can ask them any questions you have. It's honestly the best and I would really recommend them if you're someone who's wanting to get into trading."

Raishawn Afonso

"The knowledge I learnt from these guys is unbelievable. I tried another company before FMO and got no where at all. Since going with FMO I'm earning double on top of my salary."

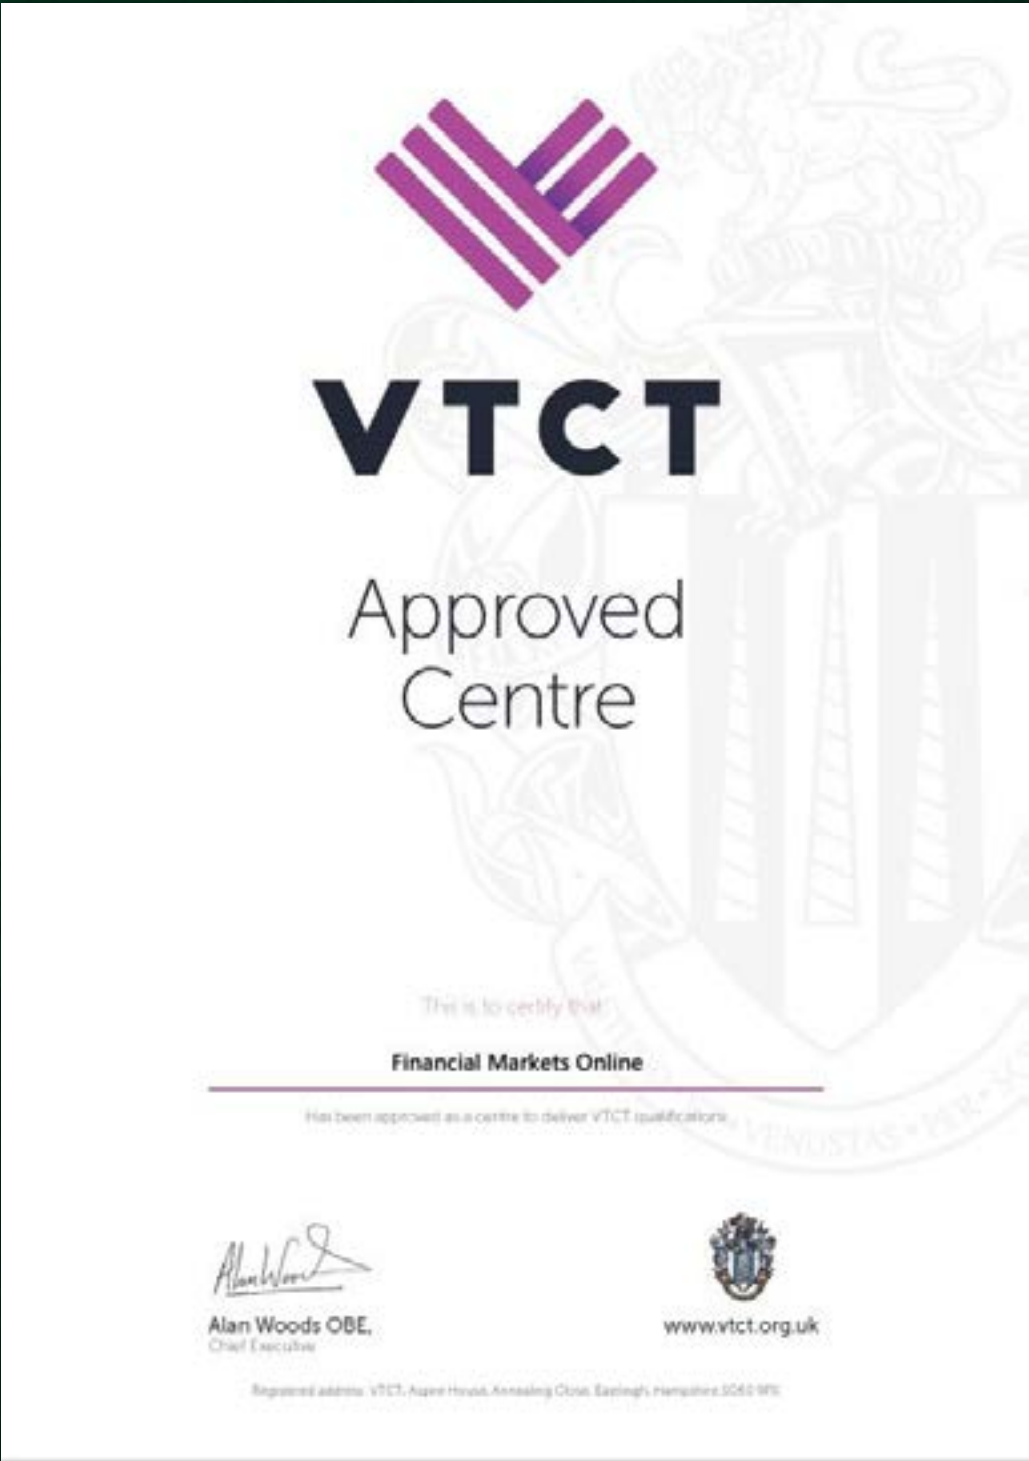

"Couldn't be happier. Highly recommend"

John Balderson

"I started working with FMO only 6 weeks ago and they've been a huge help with helping me understand the markets. They are always available for a call. I couldn't recommend this company more, the material offered is informative and they keep it simple."

COURSE OVERVIEW

The Level 5 Advanced Diploma is an exceptional accredited course that ensures you stand out for prospective employers and a confident foothold into the industry.

Modules include:

1. Financial Markets and Operations

Learners will develop the knowledge and skills to understand and analyse how the financial markets operate, while summarising the economic history and how it impacts on today's markets. They will learn how to explain the supply and demand within current economics and be able to define financial technical analysis. Students will also learn how to compare different analysis chart types and evaluate the advantages and disadvantages of market analysis.

2. Financial Products and Associated Risk

Learners will develop a sound knowledge of the different types of financial products and the risk associated with them. They will also understand how to trade bonds, foreign exchange, commodities and assess the factors that could influence risk. Students will cultivate an understanding of the short-term interest rates and the index markets and how these influence trading.

3. Financial Trading Techniques

Learners will develop a deeper proficiency of knowledge, understanding and skills to be able to trade, while learning how to keep a daily diary of the markets' behaviours. They will learn how to evaluate the pricing support and resistance that creates the supply and demand. They will also be mentored in their own trading behaviour and produce a personal development plan for continued improvement.

QUALIFICATION STRUCTURE – LEVEL 5

Across our curriculum we cover topics and concepts that offer 360 preparation to be active in financial markets.

The curriculum is organised across 3 modules, two indication learning objectives based on theory and one based on practice.

LEARNING OUTCOMES

- 1 Understand how derivatives markets operate and how to analyse the market components.
- 2 Understand fundamental macro and micro economic analysis in relation to financial market trading.
- 3 Understand technical analysis of financial market trading.
- 4 Understand the operation of different types of bond trading and associated financial risk.
- 5 Understand the operation of foreign exchange trading and associated risk.
- 6 Understand the operation of the commodities market and associated risk.
- 7 Understand the operation of options and potential risk.
- 8 Understand the operation of Short Term Interest Rates (STIRS) and associated risk.
- 9 Understand the operation of index markets and associated risk.
- 10 Be able to analyse financial market data and trading patterns whilst understanding the greater macro and micro economic environment.
- 11 Be able to trade multiple asset classes.
- 12 Understand both market psychology and individual trading psychology.

ONLINE EDUCATION WITH ONE TO ONE MENTORING

- This programme can be completed online with an average completion time of 4 weeks.
- You will be assigned an experienced professional trader who will mentor you throughout your journey to being qualified.
- Experience the emotional rollercoaster trading can be with your assigned professional trader.
- Within the mandatory units, learners are required to complete set research tasks based on current economic activity and complete a daily diary of their learning activity, showing how this has been implemented into real time trading decisions.
- Alongside this, a real time portfolio of activity is a mandatory requirement to track the learner's progress and determine the learner's understanding and implementation of the knowledge required to attain professional competence.

PROGRAMME EVIDENCING

The evidence required to be awarded the Level 5 Advanced Diploma happen to also be vital tools of your learning journey during the course.

Assessments in the form of multiple-choice questions must be completed daily and after the end of each topic to evidence your understanding of the theoretical concepts covered.

You will have 9 milestones that mark your journey through completing the 9 main learning objectives set for the theoretical aspect of the course.

A daily diary must be submitted to the trainer during the practical application stages of the course to monitor your progress and identify areas where extra focus may be necessary. This is where theory and practice come together.

You must complete at least 10 daily diaries that track your progress and show your strengths in implementing your skills and understanding in trading.

Assessments

Check your knowledge in test-like conditions

- An assessment per main topic of the first two modules
- Each assessment consists of short open-ended questions that must include the main points to satisfy the given learning objective
- Quizzes with randomised multiple-choice questions help identify these main points
- Required to score >70% per quiz

Trading Diary

Keep a daily diary to:

- Summarise overnight news
- Record technical analysis
- Identify related products and info on
- Record trades and reasoning behind
- Comment on psychology and main conditions
- Comment on overall feeling
- Suggest improvements
